

Green Engineering – Sustainable Energy and Process Engineering for the Bioeconomy (M.Eng.)

**Faculty of Resource Management
Examination Regulations 2023**

Module Overview

- Biogenic Raw Materials
- Energy and Environmental Framework Conditions
- Planning, Modeling, and Life Cycle Assessment
- Biorefinery Concepts 1
- Hydrogen / Decentralized Energy Generation
- Biorefinery Concepts 2
- Biorefinery Concepts 3
- Current Research Projects
- Required Elective
- Applied Project
- Master's Thesis and Colloquium
