

LOOKING FOR UX / UI DESIGNER!

Your **responsibilities** will include:

- Crafting intuitive, accessible, and visually appealing interfaces for mobile/web software
- Developing detailed mock-ups and engaging prototypes using Figma, giving life to our ideas.
- Playing an instrumental role in the enhancement of our company design system, contributing to a consistent, captivating visual language across our product range.
- Collaborate with product manager, designer and developers to craft seamless user experience

We offer you:

- A flexible part-time role that can transition into a full-time opportunity post-graduation, designed to align perfectly with your university schedule
- The chance to put your academic knowledge into practice in a supportive and collaborative startup environment where your ideas are valued
- The enriching experience of working with a diverse international team, opening the doors to global perspectives and ideas

As an ideal candidate, you:

- Have a proficiency in UI design software such as Figma.
- Have a portfolio of UI designs for mobile/web software
- Have a good command of english (B2+)
